Job Briefing and Planning Checklist			
Identify			
	Hazards Voltage levels involved Skills required		Number of people needed to do the job Shock protection boundaries Available incident energy
	Any "foreign" (secondary source) voltage source		Arc flash boundary
Ask			
	Can equipment be de-energized? Are backfeeds of the circuits being worked on possible?		Is a standby person required?
Check			
	Job Plans Single line diagrams and vendor prints Status board Information on plant and vendor resources is up to date		Safety procedures Vendor information Individuals are familiar with the facility
Know			
	What the job is Who else needs to know - Communicate!		Who is in charge
Think			
	About the extra eventWhat if?		Install and remove temporary protective grounding equipment
	Lock-Tag-Test-Try Test for voltage - FIRST Use the right tools and equipment, including PPE		Install barriers and barricades What else?
Prepare for an emergency			
	Is the standby person CPR trained? Is the required emergency equipment available? Where is it?		What is the exact work location? How is the equipment shut off in an emergency?
	Where is the nearest telephone?		Are the emergency telephone numbers known?
	Where is the fire alarm? Is confined space rescue available?		Where is the fire extinguisher? Are radio communications available?
